Summary

- Salesforce Developer with **3+** years of experience building and supporting enterprise solutions across **Sales Cloud** and **Service Cloud** using **Apex**, **Lightning Web Components (LWC)**, **Flows**, and **REST API** integrations. Skilled in Salesforce automation, data migration, security configuration, and production support, with strong knowledge of platform best practices and governor limits.
- **Salesforce Certified Platform Developer I**, Administrator, Advanced Administrator, and **Agentforce Specialist**, with hands-on experience building AI-driven workflows using **Agentforce** and **Einstein**. Active contributor to the Salesforce Trailblazer Community with 260,000+ Trailhead points and **Five Star Ranger** status, recognized for continuous learning and professional growth.

Certifications

Salesforce Certified Platform Developer I
Salesforce Certified Agentforce Specialist
Salesforce Certified Advanced Administrator
Salesforce Certified Administrator

Professional Experience

Cognizant Technology Services Pvt. Ltd

Position: Salesforce Engineer

Project: Trailblazer Community Org

Pune, MH

Feb 2024 – Present

Client: Salesforce Inc

- Configured **Sales and Service Cloud** environments to structure, manage, and secure client CRM data.
- Maintained and optimized **Experience Cloud** sites to improve portal accessibility and user engagement for Trailblazer users.
- Developed custom Apex classes and **asynchronous Apex** (including **Batch and Scheduled jobs**) to automate heavy data processing and deliver real-time metrics to clients.
- Optimized legacy **Flows**, **Workflow Rules**, and **Approval Processes** to align with evolving client requirements and reduce system overhead.
- Worked on **REST API** integrations and connected Salesforce with third-party applications using **OAuth 2.0**, **JSON**, and **Connected Apps**.
- Authored **Knowledge** articles and best-practice documentation for **Experience Cloud** help sites, directly reducing inbound case volume for routine customer queries.
- Supported **User Acceptance Testing (UAT)**, defect triaging, and release validation activities.
- Documented functional requirements, business processes, and solution designs to support project implementation and knowledge transfer.
- Managed production escalations and coordinated with cross-functional teams to ensure timely issue resolution.
- Architected and deployed **Agentforce Sales and Service** agents to automate customer touchpoints, while collaborating on internal **Employee Agent** development.
- Collaborated with cross-functional stakeholders, QA teams, and Salesforce Support to troubleshoot production issues and deliver scalable solutions.

Tata Communications Pvt. Ltd

Position: Salesforce Support Engineer

Pune, MH

July 2023 – Jan 2024

- Configured **Sales Cloud** and **Service Cloud** environments.
- Developed **Lightning Web Components (LWC)** and **Visualforce** pages for client-facing portals, improving user experience and functionality.
- Implemented **Apex triggers** and **Batch Apex** to automate workflows, reduce manual effort, and improve operational efficiency.
- Resolved high-priority support tickets across **Sales Cloud**, **Service Cloud**, and **Apex**, troubleshooting issues and delivering timely fixes within **SLA** timelines.
- Configured **Email-to-Case** and **Web-to-Case** functionalities with customized email templates to streamline case intake and routing.
- Tuned **SOQL** and **SOSL** queries to improve application performance and optimize data retrieval efficiency.
- Conducted system testing and quality assurance for new Salesforce enhancements before deployment to production.
- Deployed metadata changes across sandbox and production environments using **Change Sets** and **Metadata API**.
- Collaborated with cross-functional teams in **Agile** delivery cycles to support feature enhancements and issue resolution
- Investigated and resolved production issues related to **Flows**, Apex triggers, validation rules, and user access configurations.
